## **I. PURPOSE**

The purpose of this Waste Spill and Emergency Action Plan is to provide guidelines as to how Trinity Storage Services (TRINITY) will communicate and coordinate response activities in the case of a waste spill or other emergency. It does not supersede any of the other required response plans and in the event of conflict, the plan designated for the specific circumstances will take precedent.

## **II. CLASSIFICATION OF EMERGENCIES**

For purposes of this plan, an emergency is considered to be any event or deviation from normal operations which:

1. poses a threat to human life or health
2. may damage the environment
3. may result in damage to a facility or
4. results in an uncontrolled spill of waste to the environment.

Proper response to an individual emergency event will vary with the seriousness and consequences of the emergency. Emergencies will be classified as follows:

**Class I** - Events or spills with little or no potential for wide spread adverse effects to human health or the environment, no publicity, and/or exposure limited to the facility where the event occurs.

**Class II** - Events or spills which have potential for adverse effects to human health or the environment, attention from the public or news media, direct effect on other operating units, neighbors, contractors, or a Class I emergency that has the potential to become a Class II emergency.

The Person-in-Charge (PIC), in coordination with TRINITY Management, will decide the extent to which this plan is implemented.

### **III. WASTE SPILL RESPONSE**

Some of the wastes transported and handled by the Main Pass Storage Facility may contain hydrocarbons or other non-hazardous oilfield chemicals. Depending on the type of waste, the chemical composition and the volume spilled, the event could be classified as either Class I or Class II.

Class I events would include spills of small to large volumes of non-hydrocarbon wastes that are non-impactive to the area affected by the spill. Small volumes of hydrocarbon wastes where mobilization of clean up equipment is not practical also fall into this category.

Class II events would include spills of large volumes of non-hydrocarbon wastes with high potential to negatively impact the environment or spills that could be highly visible to the public. Moderate to large spills of hydrocarbon wastes where mobilization of clean up equipment is required, as well as hydrocarbon waste spills that continue for an extended period would be included as Class II events.

Hydrocarbon wastes are those that contain more than 10% oil or other hydrocarbons. Spills of these wastes will be treated as hydrocarbon spills, based on the total volume of hydrocarbons spilled and following the facility's Oil Spill Response Plan.

Any spills of wastes that contain reportable quantities of chemicals would be reported to the applicable authorities. Spills of hydrocarbon and non-hydrocarbon wastes would be reported to the MMS and USCG following the applicable regulations. Where practical, remediation efforts will include collection and removal of the spilled waste.

#### **IV. EMERGENCY RESPONSE TEAM**

The Emergency Response Team will consist of an Emergency Response Coordinator (ERC) [from company management] and representatives of the following groups: Insurance, Purchasing, Legal, Public Relations, Financial, Human Resources, Security, Safety & Environmental, and Operations.

During an “Emergency,” this group will provide support to the site and coordinate activities between the site and management as detailed in Section V. Emergency Response Team Duties.

Each emergency/spill situation and response will be different and an individual event may not require all of the above representatives. Only the applicable representatives will be called upon to support the PIC.

## **V. EMERGENCY RESPONSE TEAM DUTIES**

### **FACILITY PERSON REPORTING EMERGENCY**

- ◆ Ensure safety of personnel
- ◆ Call for emergency medical services (EMS)
- ◆ Call Emergency Response Coordinator
- ◆ Notify pipeline company if applicable
- ◆ Notify neighboring facilities
- ◆ Start a conversation/action log
- ◆ Implement initial control measures

### **EMERGENCY RESPONSE COORDINATOR (ERC)**

- ◆ Coordinate activities with facility
- ◆ Ask Response Team to keep logs
- ◆ Assign duties to personnel on team
- ◆ Discuss strategies with team
- ◆ Advise time of next planning/briefing meeting
- ◆ Track responsibility transfers from facility

### **PERSON-IN-CHARGE (PIC)**

- ◆ Consult TRINITY Sr. Management
- ◆ Call N.O. ERC
- ◆ Coordinate communication between site personnel and ERC
- ◆ Establish site command center
- ◆ Coordinate site activities of agency personnel
- ◆ Direct Protection, Cleanup, and Monitoring Operations
  - Develop strategies at location
  - Brief and assign operations personnel
  - Prepare site safety plan
- ◆ Handle field security
- ◆ Communicate resource needs to ERC

### **PURCHASING COORDINATOR**

- ◆ Call contractors and external resources
- ◆ Procure materials as needed

### **SAFETY & ENVIRONMENTAL COORDINATOR**

- ◆ Make agency notifications as requested
  - Request safety zones - water & air traffic
- ◆ Determine environmentally sensitive areas
- ◆ Advise ERC of safety and environmental requirements of incident
- ◆ Help develop site safety plans
- ◆ Direct safety operations
- ◆ Travel to site as required

### **PUBLIC AFFAIRS COORDINATOR**

- ◆ Prepare public statement
- ◆ Set up media center
- ◆ Coordinate photography
- ◆ Advise ERC of public relations considerations
- ◆ Dispatch PR representative to site and Coordination Center

### **INSURANCE COORDINATOR**

- ◆ Notify insurance carriers as needed
- ◆ Advise ERC of insurance considerations

### **LEGAL COORDINATOR**

- ◆ Legal issues
- ◆ Public advertisement of spill
- ◆ Advise Purchasing Coordinator as required
- ◆ Advise ERC of legal considerations

### **FINANCIAL COORDINATOR**

- ◆ Provide financial assistance as required

### **HUMAN RESOURCES**

- ◆ Notify families if injuries are incurred
- ◆ Establish hotline for families
- ◆ Assist in command center logistics
- ◆ Assist with facility manpower
- ◆ Advise ERC on personnel issues

### **SECURITY**

- ◆ Provide security assistance as required

### **Operations**

- ◆ Provide operations assistance as required

### **SENIOR MANAGEMENT**

- ◆ Contact External Affairs Team (EAT) (to be done by ERC in their absence)

### **PARTNER COORDINATOR**

- ◆ Notify partners as directed

### **ENGINEERING**

Provide engineering assistance as needed.

## **VI. PLAN IMPLEMENTATION PROCEDURES**

Plan communication will be vital during declared emergencies. A communication flowchart assuming an emergency situation is on Page 9.

If a declared emergency takes place, the highest-ranking field employee at the facility (person-in-charge - PIC) will assume full responsibility for addressing the emergency conditions at his facility. He, or someone to whom he directly delegates authority, will as soon as possible notify the following:

- 1) The facility manager or superintendent.
- 2) Senior Management
- 3) The Emergency Response Coordinator
- 4) All regulatory agencies which must, by law, be contacted in a timely manner.

The Emergency Response Coordinator will as soon as possible:

- 1) Obtain all current and pertinent information surrounding the emergency from the PIC.
- 2) Notify TRINITY Public Affairs Coordinator of emergency. Request that a contact person be provided to receive current and future information concerning the event.
- 3) Request that the TRINITY Public Affairs Coordinator activate their Media Information Plan. All communications should be coordinated through the ERC.

- 4) Notify, as soon as necessary, all appropriate TRINITY auxiliary groups appropriate for the event (Legal, Safety & Environmental, Insurance, Purchasing, Human Resources, Financial, Security, and Operations).
- 5) Assist the PIC in obtaining any required services.
- 6) Maintain a current status and event history of the emergency/spill.

The Emergency Response Coordinator (ERC) is a specifically-designated member of the TRINITY Support Services Group who is on call 24 hours/day, 7 days/week. His function is to assure that all notifications discussed up to this point have taken place. If they have not, he must coordinate with line management of the affected facility to assure that those notifications are made as soon as possible, and if requested, aid in notification.

The facility's PIC must as soon as possible:

- 1) Establish a Field Command Center.
- 2) Establish communication with the Emergency Response Team to coordinate response efforts.
- 3) Coordinate on-site response/countermeasure activities.

## **EMERGENCY COMMAND CENTERS**

Coordination and support centers for managing a crisis are to be established in the field and at an onshore location designated by the ERC. The TRINITY Emergency Response Coordinator is responsible for directing the onshore coordination during the emergency.

The ERC is responsible for maintaining the readiness of the onshore coordination effort and coordinating staff, and coverage of same. He is also responsible for communication with the facility PIC. Persons responsible for coordinating and managing emergency response actions will report to these locations immediately after being notified of an emergency situation.

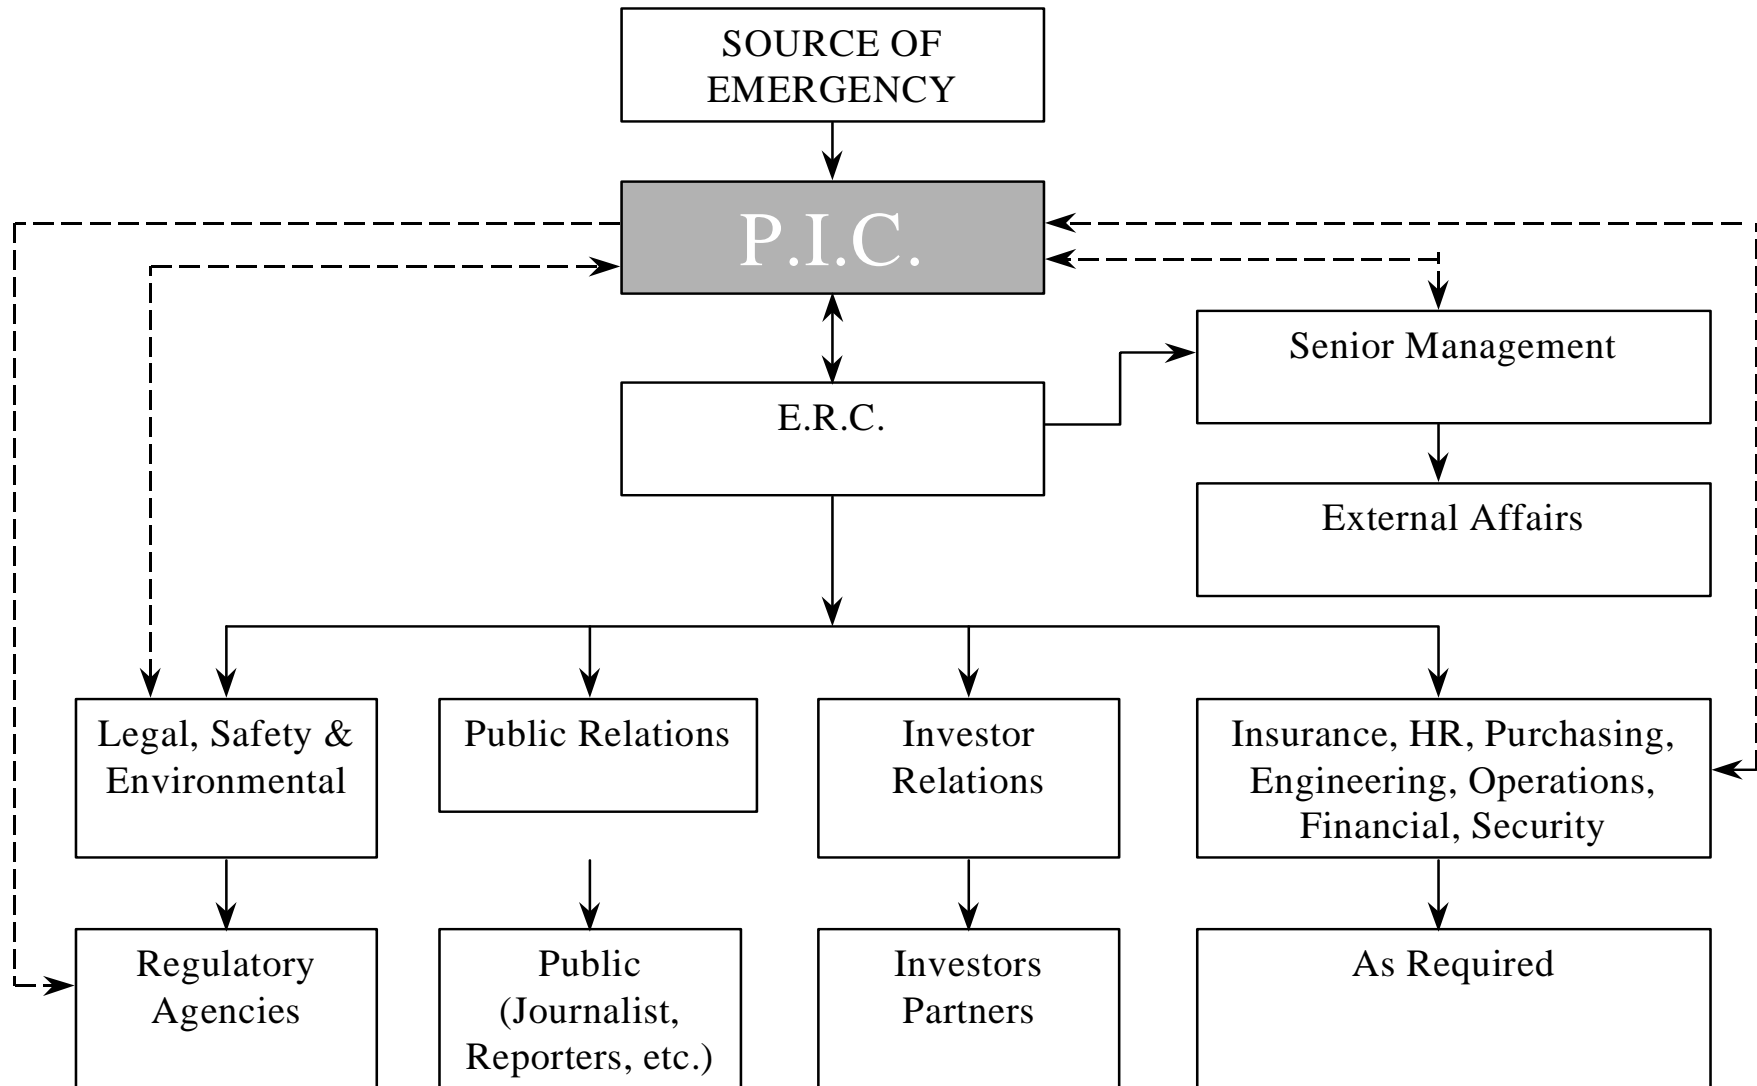

The coordination and support center locations should have access to telephone, telefax and if available, access to networked computer communication equipment.

The ERC shall maintain an adequate number of copies of emergency response procedures, telephone lists, and listings of regulatory agency reporting requirements for all team members at the coordination and support center.

## **FIELD COMMAND CENTERS**

The primary field command center will be located where the PIC so designates. It would normally be the located where the best communication capability exists and where the emergency response efforts can best be directed.

# EMERGENCY RESPONSE COMMUNICATIONS CHART

## **VII. PLAN ADMINISTRATION**

On an annual basis, the ERC will review the Emergency Response Coordination Document to confirm completeness and accuracy. A review of facility emergency plans will be reviewed annually to confirm completeness and accuracy. Plan revisions will be distributed as completed.

In coordination with an annual drill at one of the facilities, an Emergency Response Coordination Drill will be conducted and reviewed. Upon completion, the drill will be reviewed by all parties concerned. Plan revisions will be distributed as completed.
